INTERVIEW QUESTIONNAIRE

The questions listed here are intended as a general guide; they may be adapted slightly during the interview to match your role or clarify your responses. Any changes will remain within the overall scope of the project and will not affect your consent or rights as a participant.

1. **Background and role**
    a. Could you briefly describe your organisation and your role?
    b. What is the geographical scope of your organization?
    c. What kinds of issues do you work on in relation to digital finance, consumer protection, AI governance, or public advocacy?
    d. Which groups or communities do you primarily represent or engage with?
2. **Public Impact**
    a. From your perspective, in which areas of financial services is AI currently having the greatest impact on the public?
    b. What kinds of AI-enabled systems concern you most, such as credit scoring, fraud detection, customer profiling, automated advice, or customer service?
3. **Explainability**
    a. When you hear the term “explainability,” what comes to mind?
    b. In which of the previously mentioned AI applications explanations would matter most?
    c. Who are the main audiences or stakeholders for AI explanations in your context?
    d. How do the explainability needs of these audiences differ, if it does?
4. **Meaningful explanations**
    a. What does a meaningful explanation look like for consumers or the public?
    b. What information should people receive when AI affects a financial outcome?
    c. Do current explanations in financial services seem understandable and actionable?
    d. In your opinion, what is missing?
5. **Regulation and policy**
    a. How would you describe the current regulatory approach in your country or region to explanations for AI-supported decisions in financial services?
    b. Are current requirements on transparency and explanation sufficient?
    c. What do you see as the main barriers to achieving meaningful explanations for AI systems in finance?
6. **Closing**
    a. What should researchers working on explainable AI in finance pay more attention to?
    b. Are there examples, reports, or cases you would recommend reviewing?
